 Hughes Mountain Ranch (Stanford) .....406-566-2640

**Announcements**

Announcements from the auction block take precedence over any printed material.

**Herd Health**

All cattle will sell with proper health papers for interstate shipment.

**Genetic Defects**

All bulls selling have been tested free or are verified non-carrier ancestry for both AM and NH genetic defects. With the recent announcement of the newest CA genetic defect, commercial testing was not available at time of sale book production. Updates will be available on sale day.

**Payment**

Payment is due in full on sale day. Past due accounts will be subject to 1.5% interest per month.

**Delivery**

See our bull and commercial female delivery policy on page 5. For all cattle purchased over the phone or through Northern, Stevenson Genetics will be in contact following the sale to arrange delivery and payment.

**Wintering**

Wintering arrangements are available on bull calves at a cost of \$300.00 per head until March 31 of the next year.

**Inspection of Cattle**

Our cattle are available for inspection at the Ranch any time. We invite you to join us for lunch in Celebration of our 50th Sale on Saturday November 27, 2010.

**Food**

We will serve Lunch on Saturday November 27, 2010 and breakfast, lunch and dinner on Sale day.

**Terms and Conditions**

The cattle sell under the suggested terms and conditions of the American Angus Association.

Home of America's

Longest Established Annual Bull Sale

Fellow Cattleman,

It is with great pride and appreciation that we invite you to our 50th Annual Production Sale. Revered as the Longest Established Annual Bull Sale in America, this event encompasses more than just an accomplishment of longevity.

One short welcome letter simply doesn't embody the years of dedication and resolve contributed throughout this history. Through good times and bad, generations of family, generations of help and generations of cattle have persisted to sustain our end goal of producing a better mother cow. These accolades are certainly due, however that is more appropriate for a thorough chronicle rather than a sale book letter. Let's focus on today's celebration and the current successes of Stevenson Angus Ranch.

A year ago we forecasted future breeding, management, marketing – general business plans, we wholly predicted 2010 to be a monumental year. It has been.

The acknowledgement of a great year in Central Montana is welcomed. Winter was normal, however spring soon shared one of the best growing seasons on record. Late, cool spring weather coupled with plenty of moisture healed much of this country. It's nice to be reminded of the bountiful potential of "the good years." This will certainly be remembered as one.

The family is doing very well. The kids are growing and keeping busy with their 4-H projects and sporting events. We welcomed a new member to the family with Brother Mike and his new bride, Dinah making their home in Bozeman. Grandma Jeanette turned 96 this summer. Although living in Lewistown, her heart is still on the ranch.

Interest in our product, Angus genetics, is as strong as ever. Bulls. Females. Semen. Embryos. Our sire lineup has never been stronger. The most heavily influencing sires in this offering, Roundup and Ultimate, are proving themselves further with every calf crop. The listed junior herd bulls will have several years of promising influence.

As many of you know, our international business is booming. We have contracted a large shipment of breeding stock to Russia. In fact, the order was significant enough that we couldn't fulfill the request, ultimately sourcing additional cattle from Cousin Clint, Cousin Jed and Jack Holden. This is a wonderful opportunity and has proven to be a stupendous undertaking. Our cattle numbers may drop for a calving season, however the bull sales, overall cattle numbers and business in general will continue as it has for more than fifty years.

It's a great time to be in the cattle business and more specifically the Angus business. In looking forward, we are beaming with optimism and confidently positioned to aim at our 100th Annual Production Sale in the year 2060.

We look forward to hosting you for this landmark event and truly appreciate your continued support and interest.

Sincerest regards,

*Keith Darrell Bob Jake*

The family and crew of Stevenson Angus Ranch

## Information Evolution

You will notice that our presented animal information has evolved. This is a significant step for many students of data. We realize that several producers rely on individual weights and ratios. Pertinent weights and ratios are still highlighted in each footnote, however the sale bull information has been upgraded to an EPD only format. Our experience has proven EPDs to be much more accurate and reliable for everyone - you the customer, the individual bull and us as the breeder. One example of clarification would be a 92 lbs bull calf. Most would avoid him as a heifer bull, however when taking into account age of his dam, the accuracies of his generational pedigree and his individual weight and ratio, the most accurate predictor is his EPD. Of course if his dam is a three year old and he posts a +3.5 for BW EPD, he would be a one star calving ease bull recommended for cow use only. However if the same bull was born to an eight year old cow and his BW EPD was a +0.8, he would be recommended as a three star calving ease bull, recommended for larger framed heifers. Consequently, the EPDs have evolved to be a more accurate prediction of progeny performance than individual performance.

According to the American Angus Association, Expected Progeny Differences (EPDs) are a beef cattle selection tool for cow-calf and seedstock producers to rank or compare the relative genetic merit of animals. These tools are used to select sires for economically important traits that will allow future progeny to meet the desired characteristics for the producer's breeding program. The EPDs are reported in the units of measure for the trait, such as pounds of birth, weaning, yearling weights or carcass weight, or square inches of carcass ribeye area.

Unlike individual animal measures such as weights and ratios, EPDs can be compared across animals of different ages, herds, management groups and areas of the country within the Angus breed. EPDs are the common language of the beef industry to allow relative rankings comparisons of Angus seedstock for economically relevant traits.

EPDs provide a benchmark of genetic performance that is comparable across the American Angus Association database. Where weights and measures vary by season and animal age, as well as breeder and management routines, EPDs are genetic values with the environmental differences adjusted out. This allows comparison of EPDs breed wide.

EPDs incorporate varying sources of information on an individual animal and relatives, such as pedigree and the Associations weights or measures database for the trait of interest. These values allow breeders to compare animals directly against the breed population and chart their course for making genetic improvement. Updates are available weekly to further characterize Angus genetics in a timely fashion.

## How to Read the Sale Lot Information

Expected Progeny Difference (EPD) is the estimate of how future progeny of each sire are expected to perform in each of the traits listed. EPD is expressed in pounds, either plus or minus. For example, when used on the same cows, calves sired by a bull with a +50 weaning EPD should average 10 pounds more than those sired by a bull with a +40 weaning EPD. We have calculated interim EPDs for cattle that do not yet have official EPDs. **EPDs are current as of October 1, 2010.** Updated EPDs can be viewed at [www.angus.org](http://www.angus.org)

### Calving Ease Direct (CED) EPD

is expressed in percentage of unassisted births, predicting the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

### Birth (BW) EPD

is a predictor of progeny birth weight attributed to the parent.

### Weaning (WW) and Yearling (YW) EPDS

are predictors of the animal's ability to transmit weaning growth and yearling growth to its progeny.

**Milk EPD** is a predictor of an animal's genetic merit for milk and mothering ability.

**Scrotal Circumference (SC) EPD**, expressed in cm., is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

### Marbling (Marb) EPD

is expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

### Ribeye Area (RE) EPD,

expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

### Fat Thickness (Fat) EPD,

expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib of a sire's progeny compared to progeny of other sires.

\$W	31.67	\$F	39.21	\$G	17.42	\$B	47.44

**Index values are expressed in dollars per head**

**Weaned Calf Value (\$W)** is the expected average difference in future progeny performance for preweaning merit and includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk and mature cow size.

**Feedlot Value (\$F)** is the expected average difference in future progeny performance for post-weaning merit compared to progeny of other sires.

**Grid Value (\$G)** is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

**Beef Value (\$B)** is the expected average difference in future progeny performance for post-weaning and carcass value compared to progeny of other sires.

### Calving Ease Rating (CE)

- ★★★★ Excellent calving ease, use with confidence on any type of heifers.
- ★★★ Superior calving ease, should work with most heifers and most situations.
- ★★ Moderate calving ease, most people will use these bulls on cows, but they can be used on heifers if calving ease is of less concern.
- ★ We recommend these bulls just for use on cows.

## **CATTLE DELIVERY**

We encourage all of you to stop by and coordinate delivery plans before leaving the Sale. If you are buying off-site, please let us know of any special instructions as soon as you can. Otherwise, the Delivery Department will contact you regarding date of delivery. Our goal is to have all non-wintered cattle delivered by December 15. Your cooperation in taking delivery is greatly appreciated.

### **Bull Delivery**

We are happy to announce that after 50 years of selling bulls, we are still delivering in Montana for free. We charge a nominal delivery charge for the surrounding tiers of states. Please use the map below to determine this charge. We would like to emphasize that we do our best to keep delivery costs to a minimum and we are offering a volume discount if you can assist in creating full loads with minimal drops.

The delivery cost will be added to invoice at check out.

We will deliver all non-wintered cattle immediately following the sale, unless prior arrangements are made.

We will continue to offer a pickup credit of \$50 per head for all bulls picked up within 7 days of the sale.

### **Commercial Female Delivery**

All commercial females will be delivered as soon as possible after the sale. Stevenson Angus will help arrange trucking if you would like, or we can provide trucker's names and numbers for you. Your cooperation is appreciated in taking delivery in a timely manner.

## **INSURANCE**

The insurance companies that we have worked with the last few years have discontinued "loss of use" coverage.

With the reality that sometimes young bulls become injured during their first breeding season, we have worked to come up with a fair and reasonable way to share the risk with our bull customers. With customers that wanted the "loss of use" insurance we shared one-half the premium cost for coverage on the bulls to lower your risk. We have decided to continue sharing one-half the risk during this transitional period with the breeding guarantee described to the right.

Mortality insurance will still be available. **We ask that you insure any bulls that are left here to be wintered**, we are then both protected from any unforeseen incidents. An insurance representative will be here on sale day to help you with your insurance needs.

## **FIRST YEAR BREEDING GUARANTEE**

All bulls selling for \$2000 or more will be covered 50% by Stevenson Angus if they are injured during their first breeding season and not able to return to service during that first breeding season. Breeding season is defined as the 90-day period following the first turnout of the bulls.

50% of the value of the injured bull, minus salvage value, will be given as credit in a future sale or toward a replacement bull if one is available. Salvage value, if any, will be split equally between Stevenson Angus and the buyer. All injured bulls must be diagnosed by a veterinarian. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. All claims must be made by September 1, 2010.

*Example 1:* A \$5,000 bull is injured, a credit of \$2,500 minus any salvage value will be given to the buyer.

*Example 2:* A \$2,000 bull is injured, a credit of \$1,000 minus any salvage value will be given to the buyer.

*Example 3:* A \$1,750 bull is injured, no credit is given. Buyer retains all salvage value.

Longest Established Annual Bull Sale

Interested Commercial Female Buyers,

We sincerely appreciate your interest in these bred females and certainly believe this offering emphasizes our foremost efforts in genetic progression. As in the past, our goal is to emphasize quality in volume. This is a premier set of females offering plenty of selection, outstanding cattle, flexible calving dates all following proper health protocol.

These bred females will sell immediately following the conclusion of the bull sale. Understand that minor changes in lot numbers will take place. Look for those updates on sale day.

If you have any further questions don't hesitate to contact us.

Sincerely,

*The Stevenson Family*

**Bred commercial females sell immediately following the bulls on Sunday, November 28**

**To Register for Your Northern Buyer Number**

**Call 406-423-7500**

### **Terms & Conditions for Bred Commercial Females**

1. Bred females will be sorted and sold according to age, size, ranch origin and calving date.
2. The buyer has the option of five head up to the entire grouped lot.
3. They have been set up with Preg Guard Gold 10 vaccine guidelines. Heifers received first shot prior to breeding and second shot after November 1. Cows receive annual booster shot after November 1.
4. They have been poured with Dectomax after November 1.
5. All females have legible BANGs tag numbers, silver identification tag or registration tattoos.
6. All females have documented ear notch biopsy BVD-PI negative results.
7. All females will be preg checked safe with calf. They will be preg checked by a licensed veterinarian, prior to delivery.
8. Females will be available for viewing in sale lots at Stevenson Angus as early as November 20. They can be viewed at [www.StevensonAngus.com](http://www.StevensonAngus.com) on a per lot basis any time prior to the sale.
9. Interested buyers must register for buyer numbers with Northern at 1-866-616-5035.
10. Delivery cost is at the buyer's expense.
11. Purchase payment is due on sale day.

# Commercial Bred Females

**Bred commercial females sell immediately following the bulls on Sunday, November 28**

## **A** 56 Angus Bred Heifers

*Due to calve: January 21 to February 3*

- Confirmed AI bred primarily to 21AR Roundup 7005
- An excellent set of early calving heifers bred to featured ORigen/ABS calving ease sire Roundup. These calves will come easy and wean heavy.
- Great set of heifers right out of the registered herd. Several of these females descend from our best cows and cow families.

- Dam is a perfect uddered female descending from several generations of top producers
- Popular AI commercial heifer project sire for the spring of 2010
- Semen available through ORigen or ABS

Stevenson Angus Junior Herd Sires

# TWO YEAR OLD BULLS

---

These coming two year old bulls were selected last spring. These bulls were raised from birth to weaning without creep. From weaning these animals were fed a high roughage growing ration.

An explanation of the information is printed on page 4. Bulls are put into contemporary groups at weaning based upon their ranch origin and the conditions they were raised under, maintaining these groups through yearling and ultrasound makes the data and ratios provided more meaningful to our customers. Pertinent individual performance birth weights and ratios will be included within the footnotes. Understand, because the bulls are in different contemporary groups, a ratio of 100 will not necessarily correlate to the same weight between the different groups.

These bulls are guaranteed breeders. They have all passed a breeding soundness evaluation including a semen test. All bulls offered in the sale have tested BVD-PI negative. All non-virgin bulls are indicated in the footnotes and have been trich tested per current Montana requirements.

For buyers wishing to purchase closely related bulls, many full, three-quarter and one-half brothers are offered in this sale. This line-up includes:

32 ROUNDUP sons

41 IN FOCUS sons and grandsons

19 On Target grandsons

RETAINED INTEREST – we are selling FULL POSSESSION and ½ REVENUE-SHARING INTEREST in every bull in this sale. The bull you purchase is completely in your control regarding how you handle the bull and your natural service use. You receive 100% salvage value of the bull. Retaining ½ revenue-sharing semen interest simply allows Stevenson Angus the right to share in collection of semen, use of semen in our herds and the right to share in semen sale revenue if semen sales become a possibility.

Realistically, we will collect semen on a very small percentage of the bulls selling. It will be an even smaller number of bulls that will market semen. However, we realize that many promising bulls are identified after they have proven themselves in natural service. If you have any questions or concerns about our retained interest policy, please contact any Stevenson Angus.

Waynes, Jamie, Rick and Keith look over the calves that have just been weighed on test.

*Welcome...*  
*to our 7th sale at the ranch on November 22.*

Seven is a lucky number — we know that it has been a good year for us and we think you'll agree that you've been in luck when you see these tested cattle and watch how they will perform for you.

**45 COMING TWO-YEAR-OLD BULLS**

All from well known sires. Every animal in our sale has been bred and raised on our ranch. The bulls are all from blood lines that enable many of our customers to top the market with their calves year after year. Each bull has been tested under the AHIR and the IPR programs.

**5 SENIOR BULL CALVES**

Each calf tested under AHIR and IPR. These youngsters are just past their first birthday. They have been on test since May and were weighed off too late to get the data in this catalog. Of course it will be available sale day.

**5 JUNIOR BULL CALVES**

These are the first calves from Shalco Pearlstone. He is co-owned with Art Oaburnsen of Winifred. We believe that Shalco Pearlstone is one of the most promising young bulls that we have seen and that he has the potential to become a great herd sire. You may be getting in on something big with one of these grandsons of the great Keynote bull.

**55 CHOICE HEIFERS—all tested under AHIR and IPR**

Remember our slogan "back of every group of good bulls is a good cow herd." These heifers are the quality to fit into the best of registered herds. They have been officially examined by Dr. Kenneth Burdick, DVM, and are sold guaranteed safe in calf to either Waco Equity or to Fairmac Challenger.

# BULL CALVES

---

The bull calves offered in this Fall Sale are the top end of the natural and embryo calves out of mature cows born at Stevenson Angus in January and February. Calves out of first calf heifers are held over for our spring sale and calves born in March and April will be sold as long yearlings in next year's Fall Production Sale.

These calves were all born and raised in Central Montana near Hobson. The calves in this offering were raised from birth to weaning with no creep. After weaning, the calves are fed a high roughage growing ration. These bull calves were weaned and weighed from September 7<sup>th</sup> – 9<sup>th</sup>.

An explanation of the information is printed on page 4 of the catalog. These bulls are members of large contemporary groups within the Stevenson Angus herd. Because they are grouped by growing conditions, a ratio of 100 will not necessarily correlate to the same weight between the different groups. These bulls have all tested BVD-PI negative.

For buyers wishing to purchase closely related bulls, many full, half and three-quarter brothers are offered in this sale. The sale includes:

44 ROUNDUP sons

58 sons of ULTIMATE

19 ON TRACK sons

11 HERO sons

11 IN FOCUS bred sons

Wintering arrangements are available on bull calves purchased in the sale. For \$300 per head, they will be wintered and delivered after our March bull sale. Wintered bulls will have yearling and ultrasound data collected and recorded to AHIR. They will also pass a complete breeding soundness evaluation, including semen test, prior to delivery in the spring.

While these bulls are guaranteed breeders, we recommend that bulls not wintered at Stevenson Angus be fertility tested by a certified veterinarian prior to use next summer.

RETAINED INTEREST – we are selling FULL POSSESSION and ½ REVENUE-SHARING INTEREST in every bull in this sale. The bull you purchase is completely in your control regarding how you handle the bull and your natural service use. You receive 100% salvage value of the bull. Retaining ½ revenue-sharing semen interest simply allows Stevenson Angus the right to share in collection of semen, use of semen in our herds and the right to share in semen sale revenue if semen sales become a possibility.

Realistically, we will collect semen on a very small percentage of the bulls selling. It will be an even smaller number of bulls that will market semen. However, we realize that many promising bulls are identified after they have proven themselves in natural service. If you have any questions or concerns about our retained interest policy, please contact Stevenson Angus.

**Angus Production Sale**

**To Our Customers - Past - Present and Future**

We are proud of the herd we have built up over the years and the reputation they have built both here at home and in the herds of other purebred and commercial ranchers.

On many occasions we have been privileged to have shown and sold Champion bulls and females throughout the State of Montana. We have been, and are, proud and happy that these things have been the result of our long efforts to produce better Angus. But the thing that gives us the greatest happiness and satisfaction deep down is knowing that the Angus we have produced have gone out and done great jobs for the people who have bought them. Mainly from this has come a reputation we cherish and protect.

The ability of our cattle to go out and work well for the buyer has come, for a large part, from the fact that we have spared no time or dollar in purchasing and using the best sires we could find from all over the United States. In obtaining these herd sires, we have placed emphasis on breeding and background, getting Angus blood that is Nationally famous as well as breeding that has the ability to breed the qualities we prize in generations yet unborn.

These things plus the individuals at this sale are offered to you. We are confident that those of you that take our Angus home from this sale will not only be pleased today but in years to come.

Jamie Stevenson
